CORE COMPETENCIES

- Data Analysis
- ETL Processing
- Data Warehousing
- Data Cleaning
- Data Transformation
- Data Modeling
- Business Intelligence
- Data Storytelling
- Predictive Analytics

TECHNICAL SKILLS

- **Databases & Querying**: SQL, MySQL, DB2, BigQuery
- **Programming & Analysis**: Python, Pandas, NumPy
- **Data Visualization & BI Tools**: Power BI, Tableau, IBM Cognos Analytics
- Power BI Capabilities: DAX
- **Excel & Reporting Tools**: Excel, Pivot Tables, VLOOKUP, Power Query
- **Collaboration & Project Tools**: Git, GitHub, JIRA

SOFT SKILLS

- Strategic Thinking
- Structured Problem Solving
- Analytical Decision-Making
- Leadership & Initiative

EDUCATION

Bachelor of Technology (B.Tech.), Computer Science & Information Technology
Dr. A.P.J. Abdul Kalam Technical University (AKTU), Kanpur, Uttar Pradesh
2018 – 2022 | CGPA: 8.0 / 10

PROFILE SUMMARY

- Results-driven Data Analyst with **3 years of experience** in analyzing large datasets, automating reporting workflows, and delivering actionable insights across **financial services and automotive manufacturing** domains.
- Hands-on expertise in **SQL (MySQL, DB2, BigQuery)**, **Python (Pandas, NumPy)**, and BI tools including **Power BI, Tableau, Power Query, and DAX** for dashboard development, KPI reporting, and decision support.
- Proven track record of **optimizing SQL queries by 30%**, reducing manual reporting effort by **40%**, and improving business visibility through interactive dashboards, automated reports, and trend-based analysis.
- Strong capabilities in **data cleaning, data transformation, data modeling, ETL support, data warehousing, and reporting automation** to deliver accurate, scalable, and timely business intelligence solutions.
- Experienced in **sales analytics, forecasting, manufacturing and parts usage analysis, KPI tracking, and demand planning**, enabling stakeholders to make data-driven operational and strategic decisions.
- Familiar with **GCP, BigQuery, data lakes, and cloud-based analytics environments**, with the ability to work across structured and raw datasets for reporting, business analysis, and process improvement.

WORK EXPERIENCE

Data Analyst | Dec'23 – Present
Wipro (Automotive Manufacturing) | Noida, India

- **SQL Query Optimization**: Developing & optimizing complex SQL queries using advanced joins & optimization techniques, boosting data retrieval performance by 30%.
- **Dashboard Reporting:** Designing and deploying interactive **Power BI** and **Tableau** dashboards with **DAX**, **Power Query**, and KPI-driven views to accelerate leadership decision-making and improve reporting turnaround.
- **Sales Analytics:** Analyzing regional sales performance, vehicle-wise demand, color-wise sales trends, and slow- vs fast-moving products to generate actionable business insights for planning and performance tracking.
- **Manufacturing & Parts Insights:** Evaluating car-parts usage, production quantities, and demand-consumption alignment to support decisions on whether manufacturing volumes should be increased, reduced, or maintained.
- **Automation of Reporting Pipelines**: Automated recurring reporting workflow, reducing manual effort by 40%, and improving overall reporting efficiency.
- **Fraud Detection Visualizations**: Building fraud detection dashboards that contributed to a 15% reduction in fraud cases.
- **Cross-functional Collaboration**: Partnering with risk, finance, and operations teams to deliver actionable insights and track key business KPIs.
- **Predictive Analytics for Business Strategy**: Utilizing predictive analytics models to forecast key business metrics and optimize the production process.
- **Data Preparation & Cleaning:** Cleaning, transforming, and filtering raw sales and manufacturing data using **SQL** and **Python (Pandas, NumPy)** to derive relevant business metrics and improve data usability for analytics.

Junior Analyst | Mar'23 – Nov'23
Wipro (Financial Services) | Pune, India

- **ETL Data Validation:** Monitored and validated ETL pipelines between mainframe systems and reporting layers to ensure accurate financial data processing and reporting integrity.
- **SQL Query Optimization:** Enhanced DB2 query performance by **40%** through indexing strategies, query restructuring, and optimized joins.
- **Data Quality & Governance:** Conducted data validation, reconciliation, and anomaly detection to maintain high data integrity across financial reporting datasets.
- **Root Cause Analysis:** Investigated data discrepancies and system defects by analyzing transaction logs, data flows, and dataset outputs.
- **Reporting & Analytics Support:** Partnered with business and risk teams to extract and analyze financial datasets for regulatory reporting and operational insights.
- **Risk & Fraud Monitoring:** Evaluated transaction patterns to detect anomalies and support risk mitigation and fraud prevention initiatives.
- **Cross-Functional Collaboration:** Coordinated with developers, QA teams, and business analysts to ensure reliable and accurate financial data flow across enterprise systems.

CERTIFICATIONS

- SQL (Basic) Certification – HackerRank (2025)
- Databases and SQL for Data Science with Python – Coursera (2025)
- IBM Data Analyst Professional Certificate – Coursera (2025)
- Introduction to Data Analytics – Coursera (2024)
- Excel Basics for Data Analytics – Coursera (2024)
- Data Visualization and Dashboards with Excel and Cognos – Coursera (2024)
- Data Analysis and Visualization Foundations – Coursera (2024)

PROJECTS UNDERTAKEN

- **Data Professional Survey Breakdown (Power BI)**: Built interactive dashboards to analyze global trends and KPIs in the data professional space.
- **Sales Data Analysis (Excel)**: Developed a dynamic dashboard analyzing 50K+ sales transactions using pivot tables, slicers, and Power Query.
- **Retail Dashboard (Cognos)**: Designed dashboards to track customer engagement and purchasing behavior, enabling campaigns that increased retention by 15%.
- **Customer Spending Analysis (Python)**: Cleaned, processed, and visualized 100K+ transactions to identify purchasing trends using Pandas and Seaborn.
- **Employee Database Optimization (SQL)**: Streamlined the HR database, improving retrieval time by 40% and ensuring data integrity.

PERSONAL DETAILS

Date of Birth : 8th Aug 2000

Languages Known : English, Hindi & Punjabi
